

Compass Feature Pipeline: Independent Model Risk Assessment

Candidate: Cristiano Oliveira

Role: Model Risk Specialist — ML/AI Data & Infrastructure Risks (IC5)

Target System: Solara Digital Bank — Compass Feature Store

Evaluation Context: 2nd Line of Defense (2LoD) Independent Review

Date: August 2026

Compass: Context & Core Challenges

Overview of Compass footprint, known incidents, and upcoming changes.

What is Compass & Why it Matters

- **Compass is** Solara Digital Bank's central feature store and data pipeline.
- **Powers Core Decisions:** Calculates customer data for credit card approvals and in-app credit limit changes.
- **Growing Fast:** In just 9 months, 4 critical credit models across 2 countries already depend on it.
- **Shared Across Teams:** Different product teams build and update features inside Compass independently.

4 Credit Models | 2 Countries Dependent

Warning Signs & Blind Spots

- **Never Formally Validated:** Compass has been running in production for 9 months without an independent risk review.
- **Blind to Data Errors:** We only track if servers are online; we do not check if the numbers calculated are accurate, fresh, or consistent.
- **Unexplained Incidents:**
 - the same customer had conflicting data
 - decisions were made using outdated transaction history.
